Subject: Unbelievable

How is it that a bunch of do-gooder tree hugging uninformed people can come up with blanket policies that affect so many people and their right to the pursuit of happiness while ignoring the real causes for drops in fish populations. Why not eliminate the live inshore fishing for fish that get sent to Asia on a daily basis by a few commercial interests instead of eliminating the occasional father/son ability to fish for (and maybe catch 1 or 2 fish) a dinner from shore. Eliminate long-liners, drag netters, urchin fishing etc before the recreational access.
